FLOR®**
we decorate your floor

EVERYDAY COMFORT BUILT TO LAST

Life gets busy. Your floor shouldn't. Discover the effortless benefits of our cushion vinyl flooring.

WATER RESISTANT

With a 100% water-resistant top, protecting the flooring from water and spills, our cushion vinyl floors are the perfect choice for kitchens and bathrooms.

COMFORTABLE & WARM TO TOUCH

Whether walking, dancing or rolling through the house, our vinyl floors give you a warm, cushioned feel underfoot, coupled with the resilience needed for everyday life. The layered structure provides added comfort, making it a pleasant surface to walk on, even barefooted.

SILENT FLOOR

Our acoustic vinyl floors are designed to soak up sounds and improve the acoustics of your rooms. The backing not only absorbs impact noise in the room, but also prevents sound from transferring to rooms below. Welcome to a peaceful home!

SIMPLE FITTING

Cushion vinyl is supple and easy to cut with a utility knife. This makes the installation of our floors quick and simple to install.

EASY TO CLEAN

Resisting stains and scuffs, our floors are designed to withstand daily wear and tear in your home. Moreover, cleaning our cushion vinyl is a piece of cake. With just a minimal amount of water and mild detergent, your floor stays spotlessly clean.

LONG LASTING

Engineered for longevity, the hard-wearing top surface perfectly preserves the color and design of your floor. With a floor that's resistant to daily wear and tear, you enjoy a beautiful looking floor year after year.

CLASSIFICATION OF USE

Our fourteen commercial ranges are developed in line with recognised flooring industry classifications, defining product suitability by environment and ensuring reliable performance across commercial applications.

QUICK GUIDE

The first number gives an idea of the environment:

- 2: Domestic
- 3: Commercial
- 4: Industrial

The second number indicates the usage:

- 1: Moderate
- 2: General
- 3: Heavy
- 4: Very Heavy

Usage Classification 21 - 22

21 | Domestic Moderate

Suitable for areas of the home with a reduced use, such as bedrooms and bathrooms.

22 | Domestic General

The floor is perfect for domestic spaces with medium use. Ideal for the family home, including children's rooms, bathrooms, dining rooms and hallways.

Usage Classification 23 - 31

23 | Domestic Heavy

The floor is suitable for intensive use in any home. It's perfect for kitchens, playrooms or any other space with a high frequency of traffic.

31 | Commercial Moderate

Suitable for moderate use in commercial applications such as private offices, hotel rooms or flats.

Usage Classification 32 - 41

32 | Commercial General

A floor of absolute quality for domestic use but also of high quality for public, administrative or commercial places with intermediate use such as waiting rooms, hotel lobbies, exhibition halls, shops, collective offices, libraries or classrooms.

41 | Industrial Moderate

The floor is ideal for industrial spaces with a moderate use such as restaurant chains or those with a high frequency of traffic, medium-sized commercial areas or small light equipment workshops.

OUR ICONS EXPLAINED

Below icons explain the features and benefits of our products. You'll find them throughout our catalogue in our different collections. They will help you in choosing the right product.

Backing features

Tex Bac: Our textile backing smoothens irregularities in the subfloor making your floor even more soundproof.

Silver Tex Bac: Our silver textile backing smoothens irregularities in the subfloor making your floor even more soundproof.

Black Tex Bac: Our trendy black textile backing smoothens irregularities in the subfloor making your floor even more soundproof.

Comfort Bac: A polymer foam backing with excellent sound absorbing qualities providing warmth and comfort underfoot.

Power Bac: A resilient foam backing with "bouncebackability" ensuring appearance retention.

Waffle Bac: A foam backing with a waffle structure. This allows you to install your floor even faster and cover imperfections on the subfloor more easily.

Other features

Flexreme: A revolutionary interlayer giving increased tear and crease resistance.

R10: Perfect for domestic areas where an increased slip risk may occur, like kitchens, washrooms and even bathrooms (when using a bathmat). It's easy to clean while still possessing decent anti-slip properties.

R11: Superior slip resistance for both dry and wet environments, which makes this perfect for use in home environments varying from damper areas such as bathrooms and kitchens, wet rooms to hallways and even living rooms.

Digital print: Our exclusive, high definition digital printing technology makes your vinyl floor more realistic than ever before.

Slip resistant: Our innovative slip retardant enhancement - your safest choice for kitchens and bathrooms.

Natural look: Combined thermal and mechanical embossing on top of advanced printing technologies results in the natural look of real wooden or tile floor.

Floor heating: Compatible with underfloor heating. Vinyl floors have a low thermal resistance and are therefore ideal for underfloor heating.

Top coating features

ProTech coating: A high-performance coating that enhances the durability of our vinyl floors by making them resistant to dirt, scratches, and bacteria. With its advanced formula, it also ensures a cleaner, safer environment while keeping VOC emissions low.

Premium coating: The protective topcoat prevents scuffing and staining, making your floor easy to clean.

Anti-Slip coating: Ideal for when you need extra safety and protection. Our Anti-Slip coating gives added peace of mind for areas like a toilet, kitchen or care home.

Our **Low VOC lacquer** delivers a healthier indoor environment by minimizing harmful emissions. Designed for a greener and cleaner flooring solution, it provides exceptional protection while promoting better air quality.

Our **Bacteria Shield+** PU lacquer includes biocides which prevent the growth of bacteria on the surface of our floors and kills them within 24 hours.

INSTALLATION INSTRUCTIONS

GLUED DOWN CUSHION VINYL

BEFORE THE INSTALLATION

Before installation, always check if the product is the one you ordered in terms of specifications, design and colour. At the same time carefully inspect the rolls for any visible damages and defects as well as batch purity.

RECOMMENDED TOOLS

Cutter knife with trapezoid blade and hook blade

Long metal ruler or straight edge

Tape measure

Adhesive trowel: type A2

Press-on tool

INSTALLATION CONDITIONS

Storage of the rolls	≤ 2m upright and fastened / ≥ 2m horizontally and not stacked
Preparing the rolls	Cut and flatten the rolls 24 hours before installation.
Acclimatisation of the rolls	24 hours before installation at a minimum of 18 °C
Room temperature	18 - 30°C during installation and 24 h before

SUBFLOOR PREPARATION AND CONDITION

The subfloor must be solid, load-bearing absolutely flat, dry, free of cracks, clean and free from grit, dust, grease, oil, polish & old adhesive. Evenness and moisture must comply with national rules and requirement.

Type of subfloor	Preparation
Screed	Sand, prime and level
Parquet / Carpets	Must be removed, afterwards sand, prime and level the base
Tiles	Clean, prime and apply levelling compound
Asbestos sheets	Must be removed, exclusively by companies certified for asbestos removal

 Please note: the underfloor heating and cooling system must be switched off 48 hours before installation and restarted gradually 48 hours afterward.

INSTALLATION

LAYING DIRECTION

For plank and tiles designs, sheets should be installed in the same direction.

For most all-over designs, sheets should be installed in opposite directions. Check design specifications before you start.

IMPORTANT NOTES

- Take care to always have rolls of the same batch in one room.
- When you do a multiple piece installation, make sure the seams between rolls are positioned away from areas of heavy traffic.
- For cold welding make sure that the pieces overlap each other to make a double cut.
- If you want to glue the vinyl floor to the subfloor, please use suitable dispersion glue.
- Beauflor CV floorings can be installed using the 'semi loose lay' method by meaning loose lay with perimeter adhesion. Only for compact products such as Xtreme etc. it is not recommended.

ADHERING VINYL FLOOR TO SUBFLOOR

Turn back the first piece of flooring to expose about half of the subfloor.

Apply the adhesive to the subfloor in accordance with the adhesive manufacturer's instructions.

Allow the recommended drying time and then reposition the flooring material over the prepared subfloor.

Roll out with smoothing press.

Do the same (step 1 - 4) with the other pieces of flooring, take care to not overlap the glue.

With the material now lying flat around the fittings and corners, the final cutting along the wall lengths can be carried out.

CORNER CUTTING INSTALLATION

Fold the flooring twice on itself, looking for the inside corner.

Place the hook blade point in the corner and cut until outside.

Remove this part.

Once completed open up to see perfect corner shape cut.

Trim edges along the wall lengths.

AFTER INSTALLATION

First 24h: Keep traffic to a minimum.

First 72h: Do not move heavy objects back into place.
